

ANKUR OJHA

T: 9599236926 | E: ankurojha9842@gmail.com | Address: Delhi, India

ACADEMIC PROFILE			
Degree/Certificate	Institution	CGPA	Year
B.Tech Automation & Robotics Engineering	University School of Automation & Robotics	7.5	2024 - Present
SKILLS			
Programming Languages: C++, C, Python, JavaScript Web Development: HTML, CSS, React.js, Flask, Node.js Database & Tools: MongoDB, Git, GitHub, VS Code, WooCommerce, WordPress Area Of Interest: Full Stack Development, IoT Automation, Robotics, REST APIs, Embedded Systems			
INTERNSHIP/TRAINING			
Full Stack Web Developer Intern Ecomiix July'25-Aug'25 - Developed responsive web interfaces using HTML, CSS, JavaScript, and WordPress, improving cross-device accessibility and UI responsiveness. - Worked on e-commerce website optimization, implementing dynamic layouts, frontend enhancements, and scalable website components. - Assisted in integrating database-driven functionalities, improving website workflow efficiency and user interaction.			
PROJECTS			
Avasar Setu ML-Based Internship Recommendation Platform - Developed a scalable full-stack web platform using React.js, Flask, and MongoDB to streamline internship opportunity discovery for students. - Built secure backend APIs and implemented authentication workflows, dynamic frontend rendering, and modular component architecture. - Integrated Machine Learning-based recommendation logic to personalize internship suggestions based on user interests and skill profiles. - Optimized database management and responsive UI design for improved scalability and user experience. Full Stack Fashion E-Commerce Website - Engineered a responsive e-commerce platform using React.js, Flask, MongoDB, and Node.js with authentication and cart functionality. - Developed scalable frontend components and backend APIs for product management, order handling, and customer operations. - Implemented responsive UI/UX architecture and optimized database workflows for seamless cross-device performance. Smart Dustbin with Waste Segregation & Voice Assistant - Designed an IoT-enabled automation system using Arduino UNO, IR Sensors, Rain Sensors, and Motor Drivers for touchless waste segregation. - Developed embedded control logic enabling real-time hardware-software interaction, automated lid control, and sensor-based object detection. - Integrated voice assistant and motorized movement mechanisms to enhance automation functionality and smart waste management operations.			
POSITION OF RESPONSIBILITY			
Campus Ambassador E-Cell DTU - Contributed to entrepreneurship outreach initiatives, event promotions, and student engagement activities within the technical community. Executive Member Geek Room - Collaborated on technical events, developer-focused initiatives, and community engagement programs.			
HONOURS AND ACHIEVEMENTS			
- Earned Augmented Reality Certification from Bharat XR, gaining exposure to immersive technology development. - Completed AIML Certification, strengthening knowledge of machine learning workflows and intelligent systems. - Built multiple full-stack web development and IoT automation projects focused on real-world problem solving.			
EXTRA-CURRICULAR ACTIVITIES			
- Participated in technical events, collaborative coding activities, and community-driven innovation programs. - Worked on web development and IoT-based automation solutions for practical real-world applications.
